

In the abstract:

Please amend the abstract as follows:

--Clot-specific streptokinase proteins possessing altered plasminogen characteristics, including enhanced fibrin selectivity. Fibrin selectivity is enhanced by the inclusion of human fibronectin domain pairs 1,2 or 4,5. The kinetics of plasminogen activation by these proteins are distinct from those of natural streptokinase, in that there is a temporary delay or lag in the initial rate of catalytic conversion of plasminogen to plasmin. Also disclosed are processes for preparing the proteins.--

In the title:

Please change the title to read:

NOVEL CLOT-SPECIFIC STREPTOKINASE PROTEINS POSSESSING ALTERED  
PLASMINOGEN ACTIVATION CHARACTERISTICS AND A PROCESS FOR THEIR THE  
PREPARATION OF SAID PROTEIN.
